Efka® FA 4606
Excellent dispersing agent for wood and industrial coatings

Performance Highlights
- Excellent for preventing hard settlement when dispersing matting agents, inorganic fillers and glass powders
- High pigments and filler loading
- Viscosity reduction with TiO₂ dispersion and other inorganic pigments
- Cost-effective

Suitable for wood and industrial coatings
Efka® FA 4606

Excellent dispersing agent for inorganic pigments, fillers and matting agents for wood and industrial coatings

Efka® FA 4606 is a low molecular weight wetting and dispersing agent designed for excellent efficiency in dispersing and stabilizing fillers, matting agents and inorganic pigments in solvent-based systems.

Efka® FA 4606 is best suited for use in glass powder containing wood coatings formulations, which offers outstanding anti-settling properties. It is also recommended for use in other industrial coatings formulations.

Comparison of Efka® FA 4606 with competitors’ products

The diagrams below illustrates the performance on storage stability and dispersing efficiency of Efka® FA 4606 versus the competition.

Efka® FA 4606 enable formulators to achieve excellent anti-settling and dispersing properties with paints formulations
